

# Submersible Drainage & Grey Water Pumps

**Submersible 240v single phase pumps, suitable for drainage, storm water, grey water and septic disposal. All pumps are equipped with a 10m long power cable with 3-pin plug, and level control for automatic on/off operation.**

## **TPO >>**

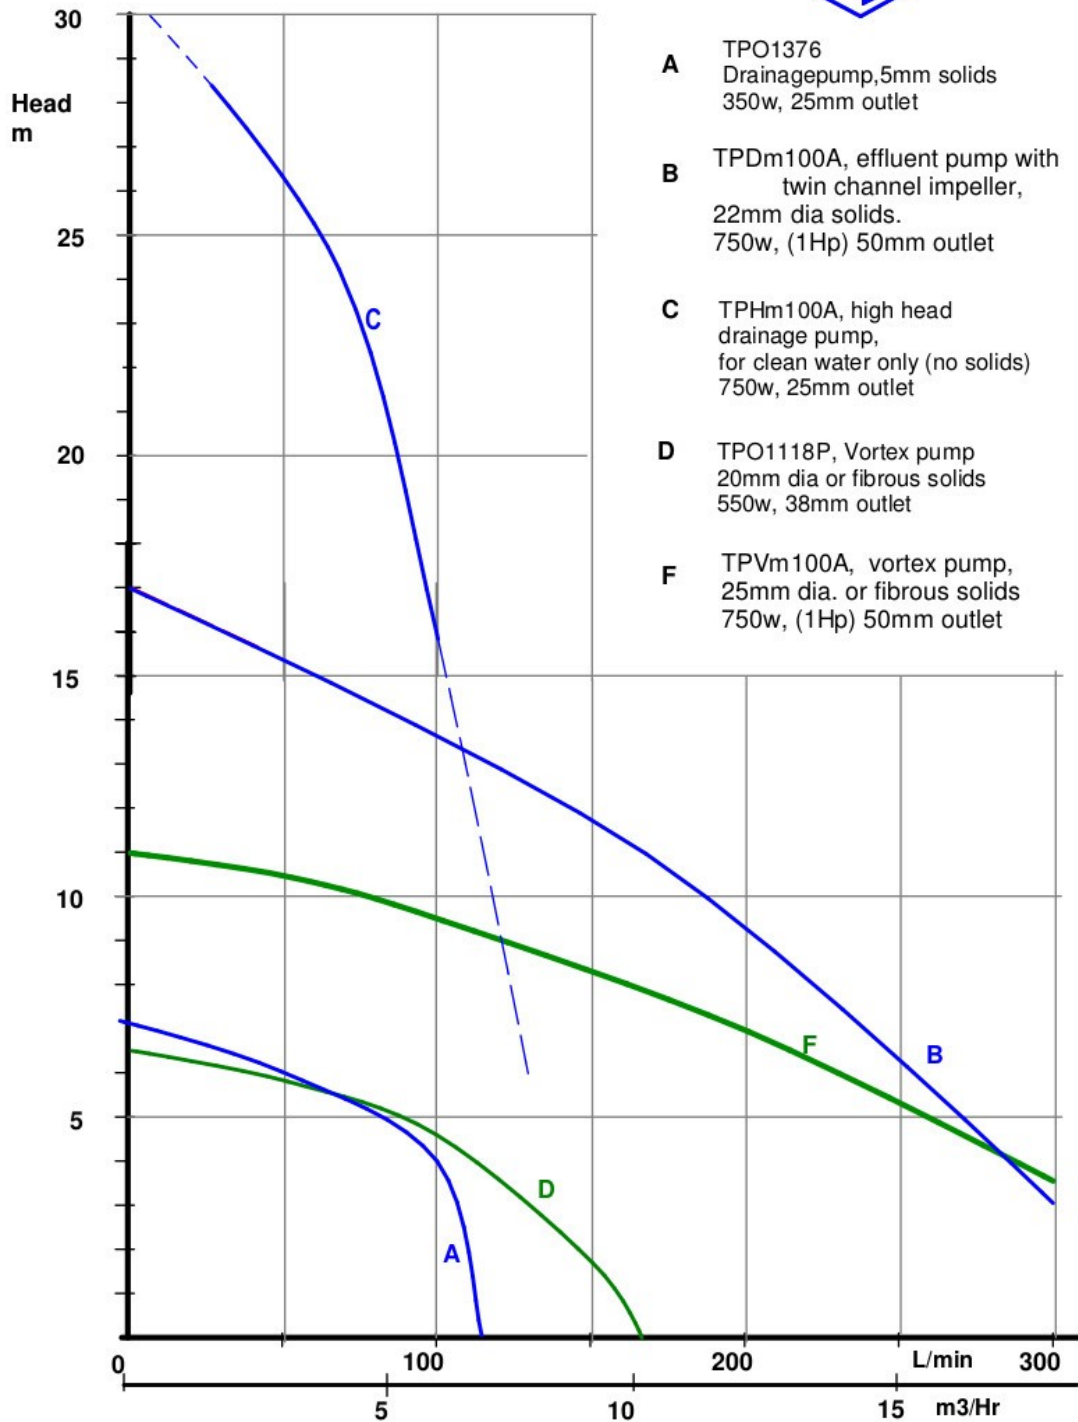

Small drainage pumps of all plastic construction, with built in level control

## **<< TPD, TPH & TPV**

Heavy duty design, featuring a motor housed in a stainless steel jacket, with cast iron end covers, and pump casing. All cast iron components receive an anti-rust treatment process for wear and corrosion resistance.
